

Expression of Interest from Industry to Collaborate for Building a Sustainable Future through Farmer Empowerment and Biotechnological Innovation at BRIC-ILS Campus, Tigiria, Odisha

Date of Release: 02nd, September, 2024.

In accordance with the cabinet approval of the BIOE3 policy and the Government of India's initiatives to boost agricultural productivity and biotechnological advancements, the Biotechnology Research and Innovation Council-Institute of Life Sciences (BRIC-ILS) invites leading organizations from the biotechnological and traditional medicinal sectors to establish a pioneering Farmer Empowerment and Biotechnology Innovation Centre at the ILS campus located at Tigiria, Odisha. This project seeks to empower local farmers through advanced agricultural practices, bio-manufacturing, and the sustainable use of local biodiversity for both agricultural and pharmaceutical advancements.

Opportunity Highlights:

- **Integrated Development Facility:** Focus on bio-products and traditional medicinal applications.
- **Bio-prospecting and Bio-manufacturing:** Harness local biological resources for innovative agricultural and pharmaceutical products.
- **Cultural and Scientific Synergy:** Merge traditional knowledge with scientific research to develop sustainable solutions for local and global challenges.

Key Benefits:

- **Leadership and Innovation:** Position your organization at the forefront of sustainable agricultural and biotechnological developments.
- **Community and Economic Growth:** Contribute to significant economic and social development in the region and create employment opportunities.
- **Access to a Global Network:** Engage with a diverse network of experts and leaders in agriculture and biotechnology.

Support and Collaboration:

BRIC-ILS is committed to providing the necessary support for infrastructure, research, and operational requirements to ensure the success of this initiative.

We invite discussions on partnerships, funding opportunities, and collaborative approaches.

Call to Action:

Towards this BRIC-ILS is inviting Expression of Interest (EOI) from commercial organizations with specialized know-how knowledge for sharing of expertise, knowledge, and resources for biotechnological innovations. Selected partners would be able to avail suitable laboratory space and access high-end equipment at BRIC-ILS following the BRIC rules and regulations. The aim of the partnership would be towards expediting the Research and Development and accelerating solutions that could be useful for the nation and also serve global needs.

We call upon visionary leaders and investors to join us in this transformative initiative, which promises to redefine industry standards and enhance the livelihoods of local farming communities.

About BRIC-ILS

The BRIC-ILS is a research institute under the Biotechnology Research and Innovation Council (BRIC), an autonomous organization of the Department of Biotechnology, Ministry of Science and Technology, Government of India. BRIC-ILS is one of the premier biological Institutes in the eastern part of India which is also engaged in exploring the vast bio-resources of the east and north-east India for the betterment of human health and welfare.
